

Skeletal Anchorage in complex challenging cases – the course for advanced users

**Prof. Dr. Benedict Wilmes,
University of Duesseldorf, Germany**

**COURSE
ORTHO WALKER**

Friday, 22th March 2024
09:00h – 17:00h

KKL Luzern
Switzerland

www.orthowalker-kieferorthopaedie.ch

WELCOME

Especially in very difficult cases, a reliable anchorage planning is mandatory to achieve a successful treatment result. Mini-Implants with different types of abutments and connectors allow the construction of versatile and effective appliances for a large variety of orthopedic and orthodontic applications. So-called multipurpose appliances help to address more than one treatment goal during the orthodontic treatment. Integration of recent advances in digital technology

such as virtual planning of a TAD installation, insertion guides and CAD-CAM design and 3D printing of orthodontic appliances broadens the options significantly. This course for advanced users will also address possible problems using skeletal anchorage and show different trouble shooting strategies.

INFORMATION

Price	CHF 650 / for training assistants CHF 180
Venue	KKL Luzern · Europaplatz 1 · 6005 Lucerne, Switzerland
