

FAS Aligner System Bringing a new Philosophy to the World of Aligners

Dr. med. dent. Domingo Martín
Dr. med. dent. Alberto Canábez

WELCOME

FAS is a new system that was created to bring improved function and excellence to the world of aligners. FAS was designed to bring vertical control into the treatment plan, based on the Arc of Closure. This allows to finish with excellent occlusion, fewer aligners and minimal refinements.

Based on a comprehensive diagnostic process, FAS considers and creates a realistic treatment plan in the ideal vertical dimension. The management of the vertical dimension is one of the aspects of the diagnostic process that distinguishes FAS and is of outmost importance to obtain an esthetic and functional result. FAS diagnoses and plans based on the patient's stable Arc of Closure.

FAS allows your patients the correct chewing pattern and to place their teeth in harmony with their joints. The Arc of Closure allows to achieve functional and esthetic goals as well as long-term stability of the treatment result. FAS uses innovative materials adapted to each stage of treatment optimi-

zing follow-up and reducing treatment time. From diagnosis and planning to manufacturing with the FORESTADENT quality seal.

Aim of Course

In this unique course, you will get acquainted with the FAS aligner system by those clinicians, who have developed it! The key to an excellent result is based on an accurate diagnosis. A critical aspect of an accurate diagnosis is to consider the roots of all teeth and their environment in all three planes of space. FAS differentiates itself by locating the roots in the alveolar bone with each treatment plan. This is a crucial element in achieving periodontal health at the end of orthodontic treatment. Knowing the limitations of tooth movements for optimal and effective orthodontic correction is a key factor ensuring the stability of the final result. FAS takes every detail into account!

**DR. MED. DENT.
DOMINGO MARTÍN
SAN SEBASTIAN**

**DR. MED. DENT.
ALBERTO CANÁBEZ
BARCELONA**

- B.A., University of Southern California.
- M.D. and D.D.S., University of Basque Country.
- M.S. in Orthodontics, University of Valencia.
- Diploma for Functional Occlusion – Roth Williams Center 1991-1993 San Francisco.
- Diploma Foundation for Bioesthetic Dentistry 2004-2006 Portland.
- Active Member Angle Society of Europe, President of the Angle Society 2014-2016.
- Diplomate of the European Society of Orthodontics (EBO) since 2008.
- Best Case of the year SEDO Granada 2019.
- Visiting Professor – Dept. of Orthodontics, Int. University of Cataluña Barcelona, Complutense Madrid, University of Sevilla.
- Visiting Professor University Complutense of Madrid – Dept. of Periodontics.
- Reviewer for the European Journal of Orthodontics, the Journal of the Turkish Orthodontic Society, the International Journal of Oral & Maxillofacial Surgery.
- Private Practice San Sebastian.

- D.D.S., Specialist in orthodontics and dentofacial orthopedics (Dental Faculty, University of the Republic, Montevideo, Uruguay).
- Private practice in Barcelona, with emphasis on functional occlusion, TMJ, esthetic orthodontics, and interdisciplinary treatment.
- Professor of FACE Roth-Williams Orthodontic postgraduate programs since 2002 in San Sebastian; since 2011 in Bucharest; since 2013 in Istanbul; since 2015 in Moscow; since 2015 in Warsaw; since 2017 in Lisboa; since 2017 in Shanghai; and since 2019 in Kiev.
- Active Member of the Spanish Society of Orthodontics.
- Member of Roth Williams International Society of Orthodontists.
- Honorary member of the Dawson Academy.
